

Box Van Range

A Box Van from Richardson Trailers is a versatile workhorse that is useful for both work and leisure activities. Our box vans are light and easy to tow and offer the additional capacity of a van with the benefits of a car.

The front section is aerodynamically designed to minimise wind resistance and maximise fuel consumption, and its Avonride suspension units provide a stable, smooth ride for towing and for your cargo.

A box van is the ideal way to transport goods and equipment; it can also be used for display, demonstration, mobile workshop and sales purposes. Amongst our clients who use a Richardson Trailer Box Van to maximum effect are health authorities; local authorities; the MOD and carpet wholesalers.

Our Box Van is designed and constructed to a very high standard, using only top quality materials and components. It is virtually maintenance free, easy to manoeuvre and easy to use, and offers real value for money.

Box Van Range
