Solid, Strong, Hardworking and Dependable

The Richardson 1258 and 1058 Livestock Trailers have been developed and built to deliver your stock to market looking and feeling their very best.

Stress to your stock is minimised by thoughtful and innovative engineering. Full width Avonride axles, independent rubber suspension and automatic reversing brakes combine to provide a smooth ride for your animals. Our engineering excellence also reduces wear and tear on your towing vehicle.

Our trailers are strong, with the optimum number of body and roof supports. Additional headroom now gives extra space for double deck loads.

Livestock Trailers

Livestock
